

PEI Trip Medication

Please place all medications a student may have (some students have several) in a container (example: zip-loc bag) that is clearly marked with the student name.

Each individual medication should be in its original bottle/container with clear concise instructions.

Provide any additional instructions – when to take, with or without food, etc.

Students are to be prepared to give their medication to a chaperone on Monday morning.

Students will have their medication collected by a chaperone who is in a room at UPEI near them. This collection will take place before departing Monday morning.

These instructions apply to ALL medications – over the counter included – must be administered by the chaperone.
